|--------------|----------------|---------------|-------------|----------------|--------------|
| • JavaScript | • Linux        | • Vuetify     | • Bootstrap | • JWT          | • Apache     |
| • HTML       | • Nuxt.js      | • Material UI | • REST API  | • Git & GitHub | • Cloudflare |
| • CSS        | • Redux        | • Figma       | • MongoDB   | • GitLab       | • Next.js    |
| • Vue.js     | • Tailwind CSS | • Node.js     | • GraphQL   | • AWS CI/CD    | • Laravel    |
| • React.js   | • Vuex         | • Express.js  | • GSAP      | • Nginx        | • Angular    |

### WORK EXPERIENCE

---

#### Frontend Developer

03/2023 – Present

##### Techbank , Kochi, Kerala, India.

- Implemented industry-standard coding practices, making the code 5X easier to maintain, debug, and read.
- Worked with teams to create responsive and fast-loading web applications.
- Integrated APIs and third-party services for enhanced functionality.
- Developed reusable Vue.js components for efficient development.
- Ensured code quality through version control and code reviews.

#### Full stack Engineer

04/2022 – 03/2023

##### Armino Technologies Pvt Ltd, Calicut, Kerala, India.

- Developed and maintained web applications using Vue.js for the front end and Node.js for the back end.
- Developed a custom report generator, rendering reports on the client-side for cost efficiency.
- Achieved pixel-perfect UIs with 100% accuracy, exceeding expectations.
- Ensured seamless communication between the front-end and back-end systems.
- Revamped the UI, significantly enhancing UI/UX.

### PROJECTS

---

#### SaaS Real Estate Management Software

Developed a SaaS Real Estate Management Platform for renting properties, hotels, and resorts. Built with Vue.js, Node.js, MongoDB, and GraphQL, it features efficient property listing, booking management, and seamless client interactions.

Stacks & libraries used:

- |              |           |
|--------------|-----------|
| • Vue.js     | • MongoDB |
| • Vuetify    | • AWS     |
| • Express.js | • Nginx   |
| • Node.js    | • Git     |

#### SaaS Restaurant Management Software

Developed a SaaS Restaurant Management Platform using Vue.js, Node.js, MongoDB, and GraphQL. Built with a retail system approach, it supports multiple branches, user roles, and modular features. Includes table reservations, menu management, and real-time order tracking for smooth restaurant operations.

Stacks & libraries used:

- |           |              |
|-----------|--------------|
| • Vue.js  | • Nuxt.js    |
| • Vuetify | • AWS        |
| • Node.js | • Express.js |
| • MongoDB | • Git        |

**DeFee Bank - Decentralized financial platform**

Developed and enhanced the UI for DeFee Bank, a decentralized financial platform, using Vue.js and Laravel. Focused on features like staking, token swapping, and digital asset management, ensuring a responsive user experience and seamless frontend-backend integration.

Stacks & libraries used:

- Vue.js
- Laravel 11
- Tailwind CSS
- SQL
- MongoDB
- AWS
- Nginx
- Git

**TLN Protocol - Decentralized financial platform**

Developed and enhanced the UI for TLN Protocol, a decentralized financial platform, using Vue.js and Laravel. Focused on features like staking, token swapping, and digital asset management, ensuring a responsive user experience and seamless frontend-backend integration.

Stacks & libraries used:

- Vue.js
- Laravel 11
- Tailwind CSS
- SQL
- MongoDB
- AWS
- Nginx
- Git

**Car Wash Management System**

The Car Wash CRM Web Application is a comprehensive platform designed to streamline operations for car wash businesses. It allows for efficient customer management, booking scheduling, and service tracking, providing an intuitive interface for both administrators and staff. With features like customer profiles, service history, and real-time updates, the CRM enhances customer engagement and operational efficiency and ensuring easy management of day-to-day tasks from any device.

Stacks & libraries used:

- Vue.js
- Material UI
- Express.js
- Node.js
- AWS
- Rout53
- Elastic IP
- Twilio – for SMS service
- Git
- Mongo DB
- ALPR - Automatic License Plate Recognition
- EC2
- CloudFront
- Nginx

**EDUCATION**

<b>Master Of Computer Applications</b> 6/2020 - 4/2022 APJ Abdul Kalam Technological University, Kerala, India	<b>Bachelor Of Computer Applications</b> 6/2017 – 4/2020 Calicut University Kerala, India
----------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------

**LANGUAGES**

English, Malayalam, Hindi, Tamil
